HPG and Covid 19

Just a quick update from us regarding how Covid 19 has affected our progress in the Stage 2 DA for One Sydney Park.

Covid 19 has affected all of us over the last 3 or 4 months and whilst we are finally seeing the benefits of our recent isolation in a freeing up of controls, the momentum back to normal will be slow and steady.

However, HPG and the One Sydney Park team have continued to pursue our stage 2 DA with City of Sydney council throughout this period as most councils have allowed their staff to continue to work from home or have flexible work arrangements in place.

Council meetings have still continued, however they have become virtual meetings and as a consequence there are fewer applications discussed at each meetings.

The good news is that whilst many sectors have all but stopped during this period, development and construction has continued, albeit with a slower pace than usual.

We expect to have clarity regarding our Stage 2 DA submission in the months ahead and will continue to keep you up to date as matters come to a conclusion.

So all in all, we have a full staff contingent working on the Stage 2 DA behind the scenes, and we will continue to work on what we all want to see – the start of construction as soon as possible!
